and ask for Casey, or visit the web site to see current job openings. Resumes also can be sent via email to resumes@americanstaffcorp.com.

Lamb is proud of American StaffCorp's outstanding reputation and our employees. "We are dedicated to our employees and clients and have earned our reputation by treating them fairly," he explains. "We get a sense of satisfaction when employees come back and report how finding the right job has bettered their lives." ♦

Better job makes for a better life!

Thousands of people find not only a new job but also a better life through American StaffCorp. BY BARBARA ANN KELLER

LIFE'S TOO SHORT TO BE IN THE wrong job.

That realization sends many people to American StaffCorp, one of the Tulsa area's oldest – and most reputable – staffing companies. In fact, more than 70,000 people have found a new career opportunity through American StaffCorp.

"Many people come to us because they want a job with higher pay, better benefits and hours, or in another part of town," reports Casey Lamb, President of American StaffCorp. "Often what they really want is a better life."

In addition to offering other employment services, American StaffCorp has a very successful temp-to-hire program. "By being a temp (temporary employee) at a particular company, the employee gets a chance to see if they like the work and the company's workplace," Lamb says. "When you enjoy the position and the employer likes the job you're

doing, most times the employee is hired permanently."

Lamb explains that a person works at a company as a temp usually for a 90-day period. During the evaluation period, the employee receives wages and benefits from American StaffCorp.

The temp-to-hire system allows the employer to determine if an employee is suited for a certain position; likewise, the employee has ample opportunity to see if this is the right job. This type of hiring process is popular with employers and prospective employees with 90 percent of American StaffCorp's job placements being in the temp to hire program.

"American StaffCorp is hiring quality employees for some of the best companies in Tulsa," Lamb points out. "The vast majority of our clients are looking for long-term employees, and we are helping them find the right people for these jobs."

American StaffCorp is a locally

owned and operated staffing company, which has been in business in Tulsa for more than 40 years. Today about 2,400 people find employment every year through American StaffCorp, making it a powerful force in Tulsa's economic development.

American StaffCorp has three divisions providing employment services for industrial, clerical and professional job seekers. Many of the jobs American StaffCorp has available are in the industrial sector, including welders, fitters, machinists, assemblers and warehouse personnel. The clerical division has job openings for receptionists, administrative assistants, data entry clerks, customer service reps and other positions. The professional division of American StaffCorp has openings in accounting, sales, quality control, engineering and drafting.

People looking for a new career opportunity or employers wanting more information on staffing services can telephone American StaffCorp
